

IQrecorder™

NETWORK VIDEO RECORDING SOFTWARE

Every IQeye is available with IQrecorder on-camera Network Video Recording (NVR) software served from the camera directly to your browser. Features and benefits include:

- Eliminates need to load client software to playback video
- Record images to your network server, network attached storage (NAS) or on-camera* using compact flash or a micro-drive
- Designed for stand-alone or small installations**
- Simple to install and operate
- Includes many sophisticated features found in larger NVR software systems

Simple Single-Page User Set-Up

Separate Settings for Normal and Event Video

Record On-Camera or to Inexpensive Network Storage

IQrecorder Manages Your Storage

Easy-To-Use Playback Page

Time - Date Search

Event Activity Search

Videoclip and Snapshot Export

* On-camera recording is only available on IQeye300 and IQeye7XX series.

** IQrecorder is a single channel recorder and is intended for 10 camera systems or fewer.
